This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

# CATALOGUE OF MAPS

OF THE

# BRITISH POSSESSIONS IN INDIA

AND

# OTHER PARTS OF ASIA.

PUBLISHED BY ORDER OF
HER MAJESTY'S SECRETARY OF STATE FOR INDIA IN COUNCIL.

LONDON:
SOLD BY W. H. ALLEN AND CO., 13, WATERLOO PLACE;
EDWARD STANFORD, 6, CHARING CROSS;
HENRY S. KING AND CO. (LATE SMITH, ELDER & Co.,) 65, CORNHILL.

1870.

# NOTE.

For the purpose of displaying the extent to which the contents of this Catalogue illustrate the geography of India, it has been arranged according to the actual divisions under which the Government is now conducted. Various gaps occur, which the surveying establishments under Colonel H. L. Thuillier, R.A., Surveyor General of India, are rapidly filling up. To give a complete statement of the classification, the following synopsis is introduced, supplying at once a key to the political divisions of India, and to the arrangement of the Catalogue.

The spelling of the names of places in the headings of the Catalogue is in accordance with Thornton's Gazetteer of India, for the sake of facilitating reference to that work, as it is the only one of the kind in print. The spelling of names in the titles of the maps is copied from the actual titles for the purpose of identification. This explanation is due to the variations of spelling which will be doubtless observed.

A list of the publications of the Geological Survey of India is appended. They are sold in London by Messrs. Williams and Norgate, Henrietta Street, Covent Garden. The only maps issued at present by the Geological Survey, accompany the "Memoirs;" but the commencement of a Geological edition of the Indian Atlas is about to be published.

The Maritime Charts formerly published by the Indian Government, are now issued by the Hydrographer of the Admiralty. They are therefore included in the Catalogue of the Admiralty Charts.
